

Techivation Releases the M-Imager

Techivation announces the release of M-Imager, the next-generation spectral stereo expander designed to deliver natural width and dimension with absolute transparency. Built for both mixing and mastering, M-Imager ensures perfect mono compatibility, razor-sharp transients, and no colouration.

At the heart of M-Imager is a custom phase-only, time-varying spectral decorrelator. The phase rotations it applies are engineered to perfection, preserving transient integrity and ensuring that punch and timing stay intact. And the side energy is continuously aligned so left/right balance never drifts. This guarantees that your mixes will translate flawlessly across playback systems, from club rigs to headphones. Push width confidently, knowing you will always get stable, natural stereo image without chorusing, flanging, or that hollow “phasey” sheen.

M-Imager key features:

- Spectral Stereo Expansion: Natural width and dimension with perfect mono compatibility.
- Advanced Decorrelator Algorithm: Phase-only, time-varying decorrelation algorithm ensures transient precision and tonal transparency.
- Stable Widening: Controlled phase rotation evolution avoids artefacts like flanging or hollow “phasey” effects.
- Side Channel Dynamic EQ: Sculpt the stereo image by grounding lows in the centre while breathing life into the sides.
- Continuous Balance Alignment: Maintains left/right balance, even under extreme width settings.
- Mastering-Grade Transparency: Preserves the original tonal balance and transient punch.
- Workflow Tools: A/B, presets, undo/redo, and scalable GUI.

Pricing and availability

Introductory Sale

M-Imager is now available at techivation.com for an introductory price of 55.00 USD. The regular price will be 129.00 USD after September 20, 2025.

Exclusive Offers

- Customer Loyalty Offers: Owners of Techivation premium plug-ins can purchase M-Imager for a loyalty price of 45.00 USD.
- Techivation Full Bundle or M-Bundle users can purchase M-Imager for 35.00 USD to complete their bundle.
- Techivation Full Access users get this plug-in for free.

Techivation M-Imager can be downloaded in VST, VST3, AU, and AAX formats for major DAWs, including Logic Pro, Cubase, Ableton Live, Pro Tools, FL Studio, Studio One, and more. It is compatible with both Windows and macOS, including native support for Apple M chips.

Free Trial

A fully functional 14-day free trial for M-Imager is available on the Techivation website, allowing users to explore its full capabilities before making a purchase.

About Techivation

Techivation is a UK-based creator of audio and music technology. Since 2021, the company has been developing easy-to-use, versatile, and practical plug-ins to assist audio and music artists in finding innovative solutions. Techivation is dedicated to producing quality tools that enhance sound, streamline workflow, and empower creativity.
