

Techivation Releases the M-Leveller

Techivation has announced the release of the M-Leveller, an innovative plug-in that revolutionises volume automation in audio mixing. According to the developer, “M-Leveller brings a new era of precision and simplicity with its event-based volume automation. By intelligently analysing and adjusting gain of individual notes or phrases, M-Leveller ensures consistent levels with unmatched transparency. It eliminates the need for manual volume automation or over-reliance on compression.”

The M-Leveller’s unique features make it a powerful tool for achieving flawless dynamics while preserving the transients and the natural timbre of the audio. Key features include a user-defined target level, noise floor control, perceptual filtering for human-like loudness sensitivity, and advanced visual feedback for intuitive operation.

M-Leveller key features:

- Event-based transparent volume automation
- User-defined target peak level control
- Noise floor control to exclude unwanted sounds
- Perceptual filter for human-like loudness sensitivity
- Real-time input/output waveform display
- External sidechain level matching
- Adjustable levelling speed for fine-tuning dynamics
- Mix Assist for intelligent parameter setting
- Gain adjustment mode (boost, cut, or both)
- Internal on/off switch and scalable UI
- Presets for quick application
- Undo/redo functionality
- And more...

Pricing and availability

Introductory Sale

M-Leveller is now available at techivation.com for an introductory price of 55.00 USD. The regular price will be 129.00 USD after March 31, 2025.

Exclusive Offers
