Techivation Releases T-Warmer Mk2

Techivation has announced the release of T-Warmer Mk2, a comprehensive upgrade to the company's acclaimed bass enhancement plug-in. Rebuilt with a brand new sound engine, T-Warmer Mk2 introduces improved sound quality, completely level-independent operation, a new Drive control for more intense harmonic shaping, and zero-latency processing for a smoother, more flexible workflow.

T-Warmer Mk2 is designed to add musical warmth, thickness, and weight to low and mid frequencies with precision and consistency. With zero-latency operation, it has been carefully engineered to perform flawlessly in real-time applications such as studio recording, live performances, and tracking. Whether enhancing bass, drums, vocals, guitars, synths, or full mixes, its refined harmonic saturation system offers a wide range of tonal possibilities—from subtle warmth to aggressive low-end reinforcement—making it an essential tool for adding fullness and character to any sound source.

Key Features of T-Warmer Mk2:

- Level-Independent Processing: Delivers consistent warmth and harmonic enhancement regardless of input level
- Enhanced Sound Engine: Reworked Phat, Smooth, Hard, and Warm saturation modes with improved character and sound quality
- New Drive Control: Pushes the saturation harder for richer harmonics and stronger tonal coloration
- Warmth Control: Adds thickness, weight, and warmth to low and mid frequencies
- Focused Frequency Shaping: Targets the enhancement range for precise low-end and midrange processing
- Parallel Processing Workflow: Mix control allows easy wet/dry blending for balanced enhancement
- High-Resolution Processing: Up to 8x Oversampling for reduced aliasing and higher audio quality
- Live-Ready Performance: Zero-latency operation makes it ideal for tracking, live use, and real-time workflows

Pricing and Availability

Introductory Sale
T-Warmer Mk2 is available now at techivation.com for an introductory price of $34 USD. The regular price will be $49 USD after March 25, 2026.
