

Techivation Releases T-Compressor Mk2

Techivation has announced the release of T-Compressor Mk2, a comprehensive upgrade to the company's acclaimed compression toolkit. Rebuilt from the ground up, T-Compressor Mk2 introduces a revolutionary multi-stage serial and parallel compression workflow, enhanced sound quality with refined dynamic response, and a redesigned interface for a smoother, more intuitive experience.

T-Compressor Mk2 is designed to deliver powerful yet transparent dynamic control through its innovative Stage-based architecture. With zero-latency processing, it has been carefully engineered to perform flawlessly in real-time applications such as studio recording, live performances, and streaming. Whether shaping individual tracks or gluing full mixes, its refined control system offers limitless creative combinations—from subtle leveling to aggressive pumping—making it an essential tool for vocals, drums, bass, guitars, and master bus processing.

Key Features of T-Compressor Mk2:

- **Revolutionary Stage Tabs:** Create up to 3 compressor Stages, organised like browser tabs for seamless serial compression, with the ability to reorder chains and full Undo/Redo support
- **Dual Parallel Processing:** Per-Stage Mix controls for individual wet/dry blending, plus a Global Mix control for overall parallel compression workflow
- **Enhanced Sound Engine:** Four character modes including Clean (transparent), Crisp (bright tube-inspired), Warm (dark tape-inspired), and Thick (signature Loudener-style saturation)
- **Precision Dynamics:** Comprehensive controls for Threshold, Ratio, Knee, Attack, and Release with per-Stage gain reduction VU-meters
- **Visual Feedback:** Real-time waveform display showing Stage input/output (grey) and gain reduction (red) for precise parameter tweaking
- **Flexible Routing:** Mid/Side mode and adjustable Stereo Link (0–100%) for independent or linked channel processing
- **Sidechain:** High-Pass Filter prevents low frequencies from triggering compression, plus Auto Gain compensation for level-matched output
- **High-Resolution Processing:** Up to 8x Oversampling (Ultra mode) for reduced aliasing and superior audio quality
- **Pro Utilities:** Per-Stage Make Up Gain, Output Gain, A/B comparison, scalable UI, and comprehensive preset system

Pricing and Availability

Introductory Sale

T-Compressor Mk2 is available now at techivation.com for an introductory price of \$35 USD. The regular price will be \$59 USD after March 20, 2026.

Exclusive Offers

- **Free Upgrade:** Existing T-Compressor (Mk1) users receive Mk2 for free.
- **Loyalty Offer:** Owners of other Techivation premium plug-ins can purchase Mk2 for just \$25 USD during the introductory sale.
- **Full Access Users:** Receive T-Compressor Mk2 for free as part of their access plan.

T-Compressor Mk2 is available in VST, VST3, AU, and AAX formats, and supports major DAWs including Logic Pro, Cubase, Ableton Live, Pro Tools, FL Studio, Studio One, and more. It is compatible with both Windows and macOS, with native support for Apple Silicon chips.

Free Trial

A fully functional 14-day free trial is available at techivation.com, allowing users to explore the full potential of T-Compressor Mk2 before purchasing.

About Techivation

Techivation is a UK-based creator of audio and music technology. Since 2021, the company has been developing easy-to-use, versatile, and practical plug-ins to assist audio and music artists in finding innovative solutions. Techivation is dedicated to producing quality tools that enhance sound, streamline workflow, and empower creativity.
