

Techivation Releases the T-De-Breather

Techivation has announced the release of T-De-Breather, the latest addition to its T-series of plug-ins. T-De-Breather is a flexible zero-latency breath suppression plug-in designed for vocals and dialogue. It automates breath level adjustment while offering detailed control over its detection algorithm, helping users identify and suppress unwanted breaths with precision.

T-De-Breather's hybrid audio engine combines advanced algorithmic audio analysis with real-time predictive forecasting using a Recurrent Neural Network, allowing the plug-in to operate with zero latency for live performance, recording and post-production workflows. Breaths are identified according to their unique spectral and time-domain characteristics, making the detection process completely level-independent. As a result, T-De-Breather can detect and suppress breaths regardless of how loud or quiet they are.

Because the distinction between breath and sibilance can be subtle, T-De-Breather detects both and allows users to fine-tune the balance between them. Dedicated controls make it possible to suppress breaths while simultaneously reducing unwanted sibilance, helping produce cleaner and more consistent vocal recordings.

T-De-Breather key features:

- Breath Gain
- Breath Target
- Waveform Display
- Detection Balance
- Detection Meter
- Breath Boundary Slider
- Sensitivity
- Speed
- Sibilance
- Mix Control
- Diff
- Output Gain

- And more...

Pricing and availability

T-De-Breather is now available at techivation.com for an introductory offer of **45.00 USD**; The original price will be 90.00 USD after **September 5, 2026**.

Crossgrade & Upgrade Offers: Owners of Techivation premium plug-ins can purchase T-De-Breather for a loyalty price of **35.00 USD**.

**Techivation Full Access Users get this plug-in for free.*

The Techivation T-De-Breather can be downloaded in VST, VST3, AU, and AAX formats for any major DAW on the market, including Logic Pro, Cubase, Ableton Live, Pro Tools, FL Studio, Studio One, and more. It is available for both Windows and macOS. Techivation plug-ins also support Apple M chips natively.

Free Trial

A fully functional 14-day free trial for T-De-Breather is available on the [Techivation website](https://techivation.com), offering users to test the plug-in before committing to a purchase.

About Techivation

Techivation is a UK-based creator of audio and music technology. Since 2021, the company has been developing easy-to-use, versatile, and practical plug-ins to assist both beginner and professional audio and music artists in finding practical solutions. Techivation remains fully committed to its vision of producing quality tools designed to help music producers and engineers innovatively improve their music and audio sound, simplify their workflow, and focus more on creativity.
